Objective

Results-driven Data Analyst and Database Administrator with expertise in data management, visualization, and analysis using R, SQL, Python, Power BI, and big data technologies like Hadoop and Spark. Skilled in ETL processes, SQL database management, and leveraging complex datasets to deliver actionable insights that drive strategic, data-informed decisions and enhance organizational performance.

Key Skills

- **ETL Tools:** MS SSIS/SSRS, IBM Netezza
 - **Programming Languages:** SQL, Python, R
 - **Database Systems:** MS SQL Server, Sybase
 - **Data Visualization:** Tableau, Power BI
 - **Big Data Technologies:** Hadoop, Spark
-

Professional Experience

Media Search Analyst TELUS Digital AI Data Solutions | Remote (Canada)

Sep 2024 – Present

- Conducted qualitative and quantitative research to improve search engine relevance and user experience.
- Provided actionable insights to enhance AI data solutions and digital tools.

Data Analyst Intern World Wireless Solutions | Toronto, ON

Nov 2024 – Present

- Developed data-driven strategies for clients in financial and retail sectors based on market research.
- Created executive dashboards in Power BI and Tableau to deliver clear insights.
- Integrated Google Analytics to monitor and enhance website performance, increasing user engagement.

Market Research Analyst Almurassel - Independent Online Magazine | Remote (Washington, DC)

Dec 2023 – Nov 2024

- Analyzed market trends to refine marketing strategies and improve content delivery.
 - Utilized Google Analytics to assess audience engagement and optimize website performance.
 - Investigated U.S. elections and campaign finances, emphasizing their global political impact.
-

Education

Postgraduate Diploma in Data Analytics

Toronto School of Management | Toronto, ON

May 2024 – May 2025

- Focus: Data mining, multivariate statistics, decision analytics, optimization, deep learning

Bachelor of Law

University of Jordan | Amman, Jordan

Sep 2012 – Jan 2017

- Focus: Analytical, research, and critical thinking skills
-

Projects

Canadian IT & Analysis Wages (2014-2023) | [GitHub](#)

- Analyzed wage trends in Canada's IT sector, creating detailed visualizations using Power BI.
- Highlighted regional differences and industry-specific trends through data cleaning and analysis.

Wine Pricing Strategy Analysis for BurgundySip | [GitHub](#)

- Conducted a comprehensive analysis of wine characteristics (e.g., ratings, acidity, price).
- Built regression models to predict price and performed cluster analysis for targeted pricing strategies.
- Delivered actionable insights via professional presentations and detailed R code analysis.

HR Analytics OLAP Database for VivaK

- Designed and implemented a MySQL OLAP database for a global retail chain.
- Cleaned and normalized data, created a robust schema, and performed advanced calculations for decision-making.

Sentiment Analysis and Text Mining for Amazon Book Reviews

- Analyzed 142.8M Amazon book reviews using Python.
- Built logistic regression models to predict sentiment and book ratings.
- Visualized insights through word clouds and interactive dashboards.

Interactive Dashboards for Construction Inventory Analysis

- Developed Tableau dashboards to optimize inventory management.
 - Delivered insights on purchase orders, inventory tracking, and reconciliation through data storytelling.
-

Certifications & Training

- Data Analysis in R (Coursera)
- Hadoop and Spark (LinkedIn Learning)
- Foundations of Project Management (Google)
- Certified Information Privacy Professional/Canada (CIPP/C) (In Progress)
